DESCRIPTION: LIP GLOSS CANCER REPORTER MARIA CELESTE

In Health Today: They now say that products to hydrate and add shine to lips could increase the risk of developing skin cancer on the lips – one of the most aggressive types! According to some dermatologists, some lip glosses allow the sun's ultraviolet rays to penetrate directly the skin on the lips which is potentially dangerous.

DESCRIPTION: GATOR BLOOD FOR ANTIBIOTIC REPORTER : M.CELESTE

Gator blood can serve as an ingredient in new antibiotics to combat infections caused by ulcers, burns, and perhaps even the virus that causes AIDS. Researchers in Louisiana have isolated a particular protein in the reptile's blood which, as they confirmed in the laboratory, is capable of destroying even the so-called "super bacteria" that is resistant to antibiotics. If you recall, several months ago cases of this infection were found in various places. It is hoped that the first medicines made with gator blood will be in pharmacies within 7 – 10 years.

DESCRIPTION: HIGH TECH ART REPORTER CANDELA FERRO

We now go to South Korea, where some of the world's most famous paintings have come to life in an art gallery in the capital. The Mona Lisa, for example, was able to answer the questions of some of these young visitors. One of them asked her why she had no eyebrows...and the Mona Lisa responded that during the Renaissance, a wide forehead was considered an attribute of feminine beauty. The gallery also exhibits a talking version of the Last Supper and other masterpieces to encourage an appreciation of art in children with the help of technology.

DESCRIPTION: SUPER COOKIE REPORTER M.CELESTE

The lack of resources and food has led to the creation of a "super cookie" that will help malnourished children in Third-world countries grow up to be healthy. Nutritionists in Utah came up with the recipe, whose primary ingredient is quinoa, a grain that is cultivated in the Andean region of Bolivia, and which is rich in protein and Omega-3. The "super cookie" also contains as much calcium as a glass of milk and is said to taste very good despite being low in sugar. In fact, all the Bolivian children who tasted the cookie liked it better than their favorite snacks. Look at these three chicks, the one on the left was fed corn, the one in the middle was fed wheat, and the one on the right was fed quinoa. The difference is surprising.

DESCRIPTION: MONKEY ARM REPORTER M.CELESTE

Scientists at the University of Pittsburgh succeeded in having two monkeys move a prosthetic arm using only their thoughts. The monkeys have small sensors in their brains that were able to activate the arm to reach food. The scientists are sure that this technology will soon be able to help people who have been paralyzed due to spinal cord injuries, including soldiers injured in the field of battle.

DESCRIPTION: EXPIRED PRODUCTS REPORTER M.CELESTE

In health news, authorities found expired medicines being sold at more than 250 pharmacies throughout the state of New York, including CVS and Rite Aid. Some of the products included baby milk formula and children's cold remedies. This was a result of an investigation by the government into a thousand pharmacies throughout the state. Even though doctors say that medicines with expired dates are not toxic, only ineffective, to sell them is a violation of the law. Authorities have given the pharmacies limited time to remove the products from their shelves otherwise they will face fines...
